

# FLOTATION FORESTRY

**FG FOREST GRIP** FOR FORWARDER, HARVESTER  
AND HEAVY LOG LOADERS  
[TRA CODE: LS-2] STEEL BELT

## CHARACTERISTICS

- increased pull force
- good self-cleaning
- maximum tread width
- super grip
- robust rubber compound
- inflexible and resistant tyre sidewall
- steel-reinforced carcass

## SIZES / TECHNICAL DATA

\* in preparation for summer 2016

## FG FOREST GRIP

The external angle of the lugs produces increased pull force. An open tread pattern results in good self-cleaning. The maximum tread width distributes the machine's power across the whole tyre. The pattern minimizes slippage and enables maximum utilization of the power of the engine. The steel-reinforced carcass gives the best resistance to punctures.

# FLOTATION FORESTRY

## **FG FOREST GRIP** FOR SKIDDER [TRA CODE: LS-2] STEEL BELT

### CHARACTERISTICS

- suitable for hard subsoils
- high wear resistance because of the wider ribs
- good self-cleaning
- inflexible and resistant tyre sidewall
- steel-reinforced carcass
